

MODULES & FEATURES

Permit To Work (PTW)

PTW Checklists ensures that no work can be carried out without proper prerequisites, approved procedures, equipment checks and through the proper vetting personnels.

HSSE Inspections

HSSE Inspection allows inspectors to carry out a consistent and detailed inspection of not only the project site, but also the documentations of the projects.

Project Management

Project Management allows clients to create and manage several projects, incorporate roles, users, forms, Permit To Work, Master Plan and location of the different projects

Site Inspections

Site Inspections allows company's internal inspectors to carry out checks on the quality of the work produced by contractors

RE/RTO Inspections

The RE/RTO Inspection module further allows Project Engineers & Technical Officers to conduct a consistent check on the material and technical segment of the project site.

Task Highlight / My Task

"My Task" module in PEER provides a consistent place for users to track all of the tasks which require attentions

WHY PEER?

Paperless

The use of WSH-PEER can reduce paper usage because all forms and documents are uploaded digitally.

Browser-Based System with Responsive Design

Browser-based WSH-PEER system that can be opened using chrome without requiring the installation of additional applications. And with a responsive design, WSH-Peer can be opened from various devices that you use, including computers, laptops, tablets to smartphones.

Real-Time Monitoring With Notification Alert

Because of its "Accessible" nature, WSH-Peer can be opened from any device so you can submit update anytime and anywhere and be able to do a real-time monitoring.

WSH-Peer is also equipped with Notifications alert that can be integrated with Telegram so you will get the latest update about tasks or related.

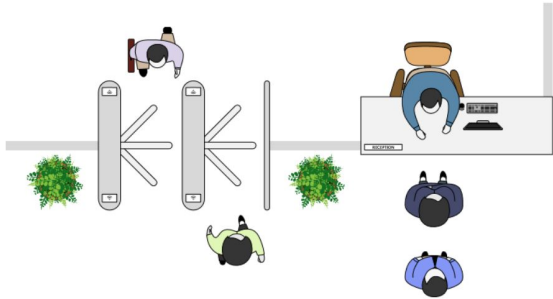

collie

Visitor Management System

Manpower Management

Manpower Management allows our client to store data profile of the personnel for registration of their passes. With a choice of singular and bulk upload, PEER's manpower management provide ease of use for our clients.

Access Control Management

Collie's access control management aim to increase security in your area. With access control implemented, it will mitigate malicious activities from happening and also help with managing any emergencies that might occur in an area or building.

Vehicle Management

Vehicle Management allow us to manage vehicle, integrated with ALPR CCTV to recognize and capture the vehicle plate numbers that enters and leave the area.

Real-Time People On-Site & Vehicle On-Site

Collie's Dashboard collects and presents data and statistics of Vehicles and Personnel coming on site in the form of info-graphs
