Our Projects

Collie Visitor Management System

Our Visitor Management System provides on site security by equipping our clients with smart gantries and round the clock CCTV surveillance. The Visitor Management system also utilises AI technology to recognise carplates of vehicles entering and exiting site.

VandaCare Mobile Application

We have developed a prototype mobile application running on Android OS for collecting and optionally for processing purposes the reading data from blood pressure, glucose and temperature meter devices.

For initial demo we are targeting on Foracare meter device D15b (blood pressure and glucose meter) for its availability reason and will be targeting other devices when necessary.

PREPARING, ESTABLISHING, ENABLING, REVIEWING
